

# Reliable

## MIG 70S - 6

COPPER COATED  
STEEL WELDING WIRE  
LAYER WOUND

### SPECIAL FEATURES

- Stable Arc with low feeding force.
- Extremely low spatter and smooth bead shape.
- Excellent Arc ignition.
- Trouble free feedability, even at high feed speeds.
- Low fume emission.

100 Kg  
250 Kg

### DRUM PACKING

We also specialize in the manufacturing of MIG Welding Wires in drum pack. These wires are available in 100 and 250 kg fiber/cardboard drums, suitable for a wide range of general applications.

# STAINLESS STEEL WELDING WIRES

## STAINLESS STEEL MIG WIRES

We produce top-notch stainless steel MIG welding wires in bright and matte finishes. Our wires undergo a specialized cleaning process to prevent contamination and ensure smooth feeding during welding. These wires are available in 100 and 250 kg fiber/cardboard drum pack.

## STAINLESS STEEL TIG WIRES

We manufacture high-quality stainless steel TIG welding wires in 36" and 1,000 mm lengths. These wires can be embossed as per customer requirements, with a bright and clean finish to prevent contamination.

## STAINLESS STEEL SAW WIRES

We produce clean and layer wound wire for submerged arc welding, ranging from 1.60 mm to 5.00 mm in various grades and finishes. Our precise engineering ensures optimal tensile strength, helix, and cast diameter for perfect "Pay-Off" performance.
